

Fluorescent Lighting Conversion Kits

Conversion Kits

Narrow High Bay Aisle Lighter Strip Conversion Kits

Aisle Lighter NHB Reflector Strip Conversion Kits are designed to convert existing T12 and T12HO strip fixtures into highly efficient 3, 4, 6 and 8-Lamp configurations in 4ft and/or 8ft strips. Available in T8 High Light Output (HLO) and T5HO configurations.

RK Ball and Chain Reflector Conversion Kits

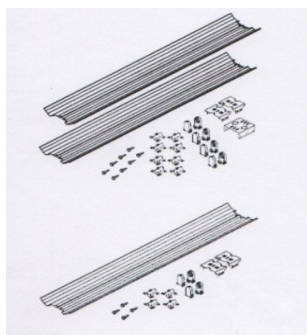

RK Reflector Conversion Kits are universal, single piece, 8ft ball-and-chain connection kits. The RK Series Reflector Conversion Kits have knockouts for 2-Lamp 3-Lamp and 4-Lamp configurations. Ball-and-chain connection brackets and light-weight aluminum reflector make strip conversion easy. RK Reflector Conversion Kits fit 4.25" - 5.00" channel widths.

Recessed Direct / Indirect T5 Troffer Conversion Kits

The KIB T5 Conversion Kit is a contemporary solution for standard 15/16" grid ceilings, retail, office, school or hospital applications popular for its low glare capabilities and soft, balanced lighting.

This design offers a perforated metal basket for aesthetic appeal. Can be used to replace Parabolic or Lensed Troffer Fixtures.

RKMP Reflector Multi-Piece Conversion Kits

RKMP Series Reflector Conversion Kits economically convert existing T12 and T12HO fixtures to energy efficient 2-Lamp and 4-Lamp T8 or T5HO configurations. Available with highly reflective aluminum reflector options and pre-wired Kits with ballast options.

All Conversion Kits are standard with White aluminum reflectors when included. Where applicable, Enhanced and Specular aluminum reflector options are available.
