

## RKMP Multi Piece Reflector Conversion Kit

**Applications:** Areas with T12 and T12HO fixtures

2-Lamp and 4-Lamp T8 configurations

**General Information:**

RK Multi-Piece Reflector Retrofit Kits are designed to economically convert standard T12 and T12HO strip luminaires into highly efficient 2-Lamp and 4-Lamp T8 and T5HO strip and industrial fixtures.

**Ordering Notes:**

1. Use of rapid start or programmed start ballasts requires unshunted lampholders and must be specified at time of placing order.
2. 5" wide fixtures require a deep reflector, please specify when ordering.

RKMP Kits feature adjustable (4.25"-5.00") center and end brackets. Brackets feature universal design and accept 1-Lamp or 2-Lamp cross-section configurations. All RK kits are suitable for 4.25" - 5.00" channel widths.

Pre-wired (PR) configurations include all sockets, wire leads and connectors, screws and fasteners required. User may install ballast with no additional components required.

Pre-wired (PRB) kits include all-prewired components and CEE listed NMEA instant-start ballast.

**Electrical:**

- All ballasts carry 3-year warranty.
- All Kit components may be purchased individually.
- Kits are suitable for sensor installations.
- Please specify program-start ballasts and non-shunted sockets when ordering.

**Standard Prewired RKMP Kit (PR) Includes:**

- Sockets, connectors & wire leads
- Ballast cover (ballast not included)
- Self-tapping screws and fasteners

**Standard Prewired Ballast RKMP Kit (PRB) Includes:**

- Sockets, connectors & wire leads
- CEE listed ballast
- Ballast cover
- Self-tapping screws and fasteners

**RKMP Reflector Strip Conversion Kit Ordering Guide**

RKMP Series	Fixture Length	Lamps	Wattage	Prewired	Prewired Ballast	Ballast	Reflector Type	Reflector
RKMP	48T = 4ft Tandem	2 = 2-Lamp 4 = 4-Lamp	32 = 32 Watt T8	PR = Prewired	B = CEE listed ballast included	L = Low N = Normal H = High	D = Deep 5" wide channel	EA = 95% WA= 91%
	96T = 8ft tandem		54 = 54 Watt T5HO
