

Single Piece "Strip Kit" Retrofit Assembly

Applications: Areas with 8ft T12 fixtures

Available in 2-Lamp and 4-Lamp, 8ft tandem T8 configurations

General Information:

The SK Single-Piece "Strip Kit" Retrofit Assembly is an 8ft aluminum strip that economically and quickly converts T12 lamped fixtures with magnetic ballasts to efficient T8 lamped fixtures with an electronic ballast.

The SK Series one-piece kits make strip retrofitting easier because all prep work is done in the shop.

The ballast is pre-wired (PR) to include all sockets, wire leads, connectors, screws and fasteners required and is mounted to the single piece 8ft ballast pan cover.

Installation is simple, requires only connecting the prewired components and attaching the ballast pan cover with the tek screws supplied with the assembly kit. The Retrofit Kit fits channels 4.25" wide.

Pre-wired Ballast (PRB) kits include all pre-wired components and CEE listed instant-start ballast.

Electrical:

- All CEE listed NMEA Instant Start ballasts carry 3-year warranty
- Program Start and Dimmable ballasts can be specified

Standard SK (PR) Retrofit Kit Includes:

- Ballast cover (ballast not included)
- Prewired sockets & wire leads
- Connectors
- Screws
- Fasteners

Standard SK (PRB) Retrofit Kit Includes:

- Ballast cover
- Prewired sockets & wire leads with instant start ballast
- Connectors
- Screws
- Fasteners

SK Series	Fixture Length	Lamps	Wattage	Prewired	Prewired Ballast	Ballast	Reflector*	Ballast Type
SK	96T = 8ft tandem	4 = 4-Lamp	32 = 32 Watt T8	PR = Prewired sockets, connectors, tek screws, fasteners & leads	PRB = Prewired sockets, connectors, tek screws, fasteners, leads & Instant Start ballast	L = Low N = Normal H = High	EA = 95% WA = 91%	I = Instant Start PS = Programmable Start D = Dimmable
